A Guide to Using the Merge Down Feature in Section Settings

1 Click the **Settings icon** in the section row that you would like to merge with the section below it, and select "**Merge Down**" from the drop-down menu.

You can only merge two sections that are adjacent to each other in the book, and only if each has a status of **In Progress**. You cannot merge sections if either of them has a status of **Checked Out**, **Complete**, or **Reviewed**.

2 A confirmation message will display listing the two section names that will be combined. Click on "**Yes**" to merge the two sections or "**No**" not to merge.
